I'm going to record what was discussed at yesterday's Ks rad sites meeting into my site logbook. It will be brief---"A meeting was convened at the EPA Region 7 offices with myself, Megan Brunkhorst, James Johnson, Mary Peterson, Chuck Hooper, Michael Beringer, and Denise Roberts in attendance. It was decided, based upon human-health risk, that we proceed with a fund-lead cleanup at the private property (920 S. St. Francis Street--Lou Guerrero and Teresa Guerrero) adjoining the Standard Products site.

[REDACTED]

I suggest you two should do the same for your respective site logbooks. James, yours will be that it was decided to proceed with a removal assessment as the PRP search is initiated. Megan, future actions at the Standard Precision site will await the outcome of a PRP search.

Randy
